Power Steering Service

\$59.95*

The power steering system operates as the control system for your wheels. It depends on the power from the vehicle and the power steering fluid to lubricate and keep the system free of contamination. When the additives wear down in your power fluid, the system does not operate as designed. Sludge, varnish, and loss of viscosity can cause leaks or power steering failure.

Power Steering Service Helps...

- Removes harmful deposits from power steering system
- Conditions and revitalizes seals
- Prevents hard steering in cold climates
- Eliminates rack and pinion steering stiffness
- Eliminates power steering noise and whining
- Minimizes risk of future leaks and premature power steering failure
